Forecast for Sunday 29 Jan 2023

Weather: Patchy light rain pushing in from the northwest by dawn, turning heavier by midday. Best of the brighter conditions in the northeast. The rain clears to the southeast by around mid-afternoon allowing some bright and sunny spells for a time. Scattered blustery showers, falling as snow above around 600m, into the evening. Strong winds throughout.

Chance of cloud-free hill tops above 800m: Very low until around mid-afternoon, slightly better in the northeast, becoming good for a time but chances decreasing significantly in showers into the evening.

Low Cloud and visibility: Extensive cloud and fog above 700 or 800m, lower in the west but some breaks in the northeast, persisting until mid-afternoon when it lifts and breaks, then scattered low cloud in association with showers. Poor visibility but good outside of showers during the afternoon/evening.

Met Office Aberdeen Meteorologist's View
Strong and very gusty winds leading to difficult walking conditions, also giving a very cold feel.

Forecast for Monday 30 Jan 2023
Weather: Showers, of snow above 600m, and strong winds easing early Monday morning to leave fine conditions for the majority of the day. Low cloud and outbreaks of rain, sleet at first, arriving from the west into the evening.

Maximum wind: Westerly 30-40 mph gusting 50-60 mph at first, reducing to 10-15 mph gusting 20-25 mph by midday. Increasing again into the evening to southwesterly 20 gust 35-40 mph.

Chance of cloud-free hill tops above 800m: 40% at first, increasing to 80%, decreasing to 10% into the evening.

Low Cloud and visibility: Scattered low cloud at first, then prolonged sunshine through the middle part of the day, becoming extensive during the evening. Visibility good outside of precipitation.

Temperature: **Glens:** Plus 3 rising to plus 7 Celsius.
At 800m: Minus 2 rising to plus 2 Celsius.
Freezing level: 600m rising to 800m into the afternoon, increasing to 1400m on the rain band.
